

## **Challenge yourself professionally and become Senior Software Engineer at Cryptomathic!**

*Dive deep into the world of advanced security technology and make a lasting impact!*

### **Job Description:**

At Cryptomathic, we are searching for an experienced Software Engineer to be part of our dedicated and talented team, where professional pride, sparring with talented colleagues and good development opportunities are the keywords

You will tackle cutting-edge digital security software development and with your experience take the role of go-to-person and mentor for other team members. You will play a crucial role in shaping our future solutions within Key Management as well as making the team successful.

### **We Offer:**

**Professional Growth:** Develop yourself through the coaching of others, facilitating collaborative problem solving in exciting technical challenges.

**Flexibility:** The workplace is right in the heart of Aarhus in beautiful, newly renovated premises and you craft your perfect work setting with opportunities for remote work.

**Dynamic Environment:** Be part of a team that adapts, evolves, and always stays ahead of technological trends.

**Work-Life Harmony:** A healthy work-life balance, ensuring you relish both your professional journey and personal moments.

You will be part of a good collegial environment with many social events, good humor and respect for each other.

### **Your qualifications:**

#### *Education:*

- Master's or bachelor's degree in computer science, engineering, or a related field.

#### *Experience - Essential:*

- A minimum of 4-5 years as a software developer.

#### *Technical Knowledge:*

- High proficiency in Java or C# - Maybe also C++
- Familiarity with code review and automatic testing.

#### *Preferred Skills:*

- A true passion for software development.
- Sharp analytical skills.
- Proficient communication in English.

You thrive on being involved in all aspects of the development process, from analysis and design to development and testing, and you want to help shape both process and technology choices. You think logically and creatively, can design new features and find solutions to technical challenges. Learning new skills comes naturally to you, and continued professional development is a must for you.

### **Why Join Cryptomathic?**
